

# ENVIRONMENTAL POLICY STATEMENT

---

**Established almost 125 years ago, Casino Group is today a leading food retailer, with more than 11,500 stores worldwide across France and Latin America.**

**With a clear vision of changes taking place in the sector, its goal is to accelerate the transformation of retail.**

As a retailer, the Group's business has an impact on the use of natural resources through its operations and the products it sells. We acknowledge the resulting environmental impact, and the retail sector's contribution to climate change.

We also recognize our role in mitigating these impacts by developing and implementing sustainable business practices designed to address climate change, use natural resources efficiently, reduce waste, prevent pollution, reduce noise, preserve biodiversity and help stop deforestation.

We know that leadership and effective oversight of environmental, social and governance (ESG) issues are key to achieving our ESG policies. We are committed to taking appropriate measures to manage environmental issues effectively and to reporting performance to the appropriate level of responsibility. ESG policies and performance are thus reported to a board committee called "Governance and CSR Committee" and to the Executive Committee of the Group.

In doing so, the Board Committee and the Executive Committee of the Group have an oversight of the environmental issues including the Group's performance in this area.

The CSR departments are in charge of implementing the environmental policy, in collaboration with the operational teams.

The Group sets environmental objectives and targets to reduce environmental impacts and conform with compliance obligations. Adherence to environmental regulations is also part of the supplier code of ethics, which forms part of the contract.

The Group is committed to continuous improvement of its policies and performances. To this end, it undertakes to set targets and objectives to reduce environmental impacts and, to monitor and measure its progress in achieving these objectives.

Measures are taken to raise awareness of environmental impacts among internal and external stakeholders, in particular through communication campaigns in stores, and at the headquarters, and by setting up networks of committed stakeholders.

Employees are trained to help them understand the impacts of their work activities on the environment. Lastly, central purchasing teams have been trained in the impact of the products sold on the company's carbon footprint and in the actions to be deployed to reduce it.

**The Group strives to provide clear and transparent information on how we manage and address the key environmental, social, and governance issues we encounter in the course of our business.**

**The Group publishes its annual ESG reports and relevant environmental documents on the ESG page of its corporate website [groupe-casino.fr](https://groupe-casino.fr)**

**This policy applies to all business units of the Group.**
